## PROFESSIONAL SUMMARY

AI/ML Engineer and Python Full Stack Developer with approximately 2 years of professional experience delivering AI-powered recruitment, HR/onboarding, and multilingual document platforms in production environments. Practical, cross-stack contributor across Python, FastAPI, Flask, React.js, SQL, and OpenAI/LLM integration, with hands-on work in resume intelligence, semantic candidate-job matching, and interview automation. Combines AI/NLP engineering with document processing, multilingual rendering, testing, regression validation, and performance optimization (prompt engineering, caching). Immediately available and seeking AI/ML or Full Stack opportunities in Dubai, UAE.

## CORE TECHNICAL SKILLS

**AI / MACHINE LEARNING:** Machine Learning · Deep Learning · NLP · Generative AI · LLMs · OpenAI API · Prompt Engineering · Resume Intelligence

**PROGRAMMING:** Python · SQL · Basic Shell Scripting

**BACKEND & APIS:** FastAPI · Flask · API Integration & Validation · Streamlit

**FRONTEND:** React.js

**DATABASES:** MySQL · Database & Schema Analysis

**CLOUD & DEVOPS:** AWS EC2 · AWS S3 · AWS Lambda · Git · GitHub

**TOOLS:** Postman · VS Code · Git/GitHub · MS Office · Remote Desktop · MS Teams

## PROFESSIONAL EXPERIENCE

### AI / Full Stack Developer

**Skandax Nexus** • Chennai, India • *September 2025 – September 2026*

- Contributed across multiple AI and full-stack products — SkandaxHIRE (AI recruitment/ATS), SkandaxONBO (HR/onboarding documents), Multilingual AI Hub, GPIA, LETA X, and Orbita — using Python, FastAPI, Flask, and React.js, demonstrating cross-project adaptability.
- Built AI recruitment functionality for SkandaxHIRE including resume parsing, ATS scoring, semantic resume-to-job matching, skill extraction, candidate ranking/evaluation, MCQ-based interview generation, and cover-letter and KYC-related modules, integrating OpenAI APIs and NLP/LLM workflows.
- Applied prompt engineering, caching, and backend optimization techniques aimed at improving AI response latency and reliability across recruitment and interview-automation workflows.
- Worked on document-generation fidelity in SkandaxONBO and Multilingual AI Hub, addressing consistency between editor representation and generated PDF/DOCX output, including Tamil rendering and alignment, translation, transcription, and text-to-speech functionality.
- Contributed AI-related backend/frontend utility work on GPIA, built responsive role-based dashboards for LETA X using React.js with Python backend integration, and supported voice-related functionality and product discussions for Orbita.
- Carried out testing, bug verification, and regression validation across products to support reliable, production-oriented functionality at integration boundaries between APIs, frontend, database, and generated documents.

### AI/ML Engineer / Python Developer — Promoted from AI/ML Intern

**Icanio Technologies** • Tirunelveli, India • *June 2024 – August 2025*

- Joined as an AI/ML Intern and was converted to a full-time AI/ML Engineer and Python Developer based on performance, taking on greater ownership of feature development and testing.
- Developed CareerBuddy AI, an AI-powered career recommendation and chatbot platform, using Python, Machine Learning, NLP, and TF-IDF-based matching techniques.
- Built an end-to-end job recommendation pipeline, including automated web scraping workflows, that improved recommendation accuracy and data collection efficiency.
- Built backend components using Python (FastAPI/Flask where applicable) to support data processing and AI model integration.
- Performed application testing, debugging, and technical troubleshooting to maintain system stability and product performance.

## SELECTED PROJECTS

**SkandaxHIRE — AI Recruitment & Talent Assessment Platform**

***Tech Stack:*** Python, FastAPI, OpenAI API, NLP, Git

- AI-powered recruitment platform spanning resume intelligence, ATS scoring, candidate evaluation, semantic job matching, MCQ interview generation, voice/emotion-related interview functionality, and cover-letter/KYC modules.
- Consumed and validated APIs across the recruiter and job-seeker dashboards, with prompt engineering and caching applied to improve AI response reliability.

**CareerBuddy AI — AI Career Recommendation Platform**

***Tech Stack:*** Python, FastAPI, OpenAI API, NLP, TF-IDF

- Built a career recommendation system and chatbot-based guidance tool using Machine Learning, NLP, resume parsing, and TF-IDF, with automated web scraping feeding the recommendation pipeline.

**SkandaxONBO — HR / Employee Onboarding & Document Platform**

***Tech Stack:*** Python, FastAPI, Document Processing, SQL

- Onboarding and HR-documents platform requiring analysis of an existing codebase, database/schema, and administrative modules (Users & API Keys, Custom PDF/Intelligence Parsing, Billing/Invoice) to build system-level understanding.
- Validated dynamic sidebar templates and document-generation output against the underlying API and database layer to maintain frontend/backend/template consistency.

## EDUCATION

**Master of Computer Applications (MCA)** — Kalasalingam University, Virudhunagar, India | Completed 2024

**Bachelor of Computer Science (B.Sc.)** — Thiagarajar Arts and Science College, Madurai, India | Completed 2022 | CGPA 8.8

## CERTIFICATIONS & COURSES

- Greens Technologies Chennai – Data Science with Machine & Deep Learning
- NPTEL – Python for Data Science
- Novitech – Full Stack Developer Course

## LANGUAGES

- English – Professional Working Proficiency | Tamil – Native Proficiency

## ADDITIONAL INFORMATION

- **Current Location:** Dubai, UAE
- **Nationality:** Indian
- **Visa Status:** Visit Visa
- **Availability:** Available for immediate joining, subject to required employment and visa formalities
