

SIVA SURYA S

AI/ML ENGINEER • PYTHON FULL STACK DEVELOPER • IT & APPLICATION SUPPORT ENGINEER

Tamil Nadu, India | +91 8072079799 | sivasurya06082001@gmail.com
linkedin.com/in/sivasurya-ai | github.com/sivasurya681

PROFESSIONAL SUMMARY

AI/ML Engineer and Python Full Stack Developer with approximately 2 years of professional experience delivering AI-powered recruitment, HR/onboarding, and multilingual document platforms in production environments. Practical, cross-stack contributor across Python, FastAPI, Flask, React.js, SQL, and OpenAI/LLM integration, with hands-on work in resume intelligence, semantic candidate-job matching, and interview automation. Demonstrated ability to analyze existing codebases and databases, validate APIs and templates, and resolve frontend-to-backend integration issues, reflecting growing system-level responsibility across multiple products. Combines AI/NLP engineering with document processing, multilingual rendering, testing, regression validation, and performance optimization (prompt engineering, caching). Immediately available and seeking AI/ML, Full Stack, or Application/IT Support opportunities in Dubai, UAE.

CORE TECHNICAL SKILLS

AI / MACHINE LEARNING Machine Learning · Deep Learning · NLP · Generative AI · LLMs · OpenAI API · Prompt Engineering · Resume Intelligence	PROGRAMMING Python · SQL · Basic Shell Scripting
BACKEND & APIS FastAPI · Flask · API Integration & Validation · Streamlit	FRONTEND React.js
DATABASES MySQL · Database & Schema Analysis	CLOUD & DEVOPS AWS EC2 · AWS S3 · AWS Lambda · Git · GitHub
IT & SYSTEM SUPPORT Windows 10/11 · Windows Server (Basic) · Linux (Basic) · Hardware & Application Troubleshooting · Desktop Diagnostics · User Account Management · Remote Technical Support · Backup & Recovery · Deployment Support · System Maintenance · Incident Resolution	NETWORKING TCP/IP · DNS · DHCP · LAN/WAN · Router & Switch Configuration (Working) · Active Directory (Basic)
TOOLS Postman · VS Code · TeamViewer · AnyDesk · Remote Desktop · MS Office · Outlook · MS Teams	

PROFESSIONAL EXPERIENCE

AI / Full Stack Developer

Skandax Nexus • Chennai, India • September 2025 – Present

- Contributed across multiple AI and full-stack products — SkandaxHIRE (AI recruitment/ATS), SkandaxONBO (HR/onboarding documents), Multilingual AI Hub, GPIA, LETA X, and Orbita — using Python, FastAPI, Flask, and React.js, demonstrating cross-project adaptability.
- Built AI recruitment functionality for SkandaxHIRE including resume parsing, ATS scoring, semantic resume-to-job matching, skill extraction, candidate ranking/evaluation, MCQ-based interview generation, and cover-letter and KYC-related modules, integrating OpenAI APIs and NLP/LLM workflows.
- Applied prompt engineering, caching, and backend optimization techniques aimed at improving AI response latency and reliability across recruitment and interview-automation workflows.
- Analyzed an existing SkandaxONBO codebase and database/schema to build practical system-level understanding, investigating and validating APIs, HR Documents, and dynamic sidebar templates as part of expanding technical responsibility on the platform.
- Investigated a user-facing "Failed to load document template" issue in SkandaxONBO, validating template-loading behaviour and the GET /api/v1/templates/sidebar API response, and carrying out regression validation of frontend/backend/template data flow.
- Worked on document-generation fidelity in SkandaxONBO and Multilingual AI Hub, addressing consistency between editor representation and generated PDF/DOCX output, including Tamil rendering and alignment, translation, transcription, and text-to-speech functionality.

- Contributed AI-related backend/frontend utility work on GPIA, built responsive role-based dashboards for LETA X using React.js with Python backend integration, and supported voice-related functionality and product discussions for Orbita.
- Carried out testing, bug verification, and regression validation across products to support reliable, production-oriented functionality at integration boundaries between APIs, frontend, database, and generated documents.

AI/ML Engineer / Python Developer — Promoted from AI/ML Intern

Icanio Technologies • Tirunelveli, India • June 2024 – August 2025

- Joined as an AI/ML Intern and was converted to a full-time AI/ML Engineer and Python Developer based on performance, taking on greater ownership of feature development, testing, and technical support.
- Developed CareerBuddy AI, an AI-powered career recommendation and chatbot platform, using Python, Machine Learning, NLP, and TF-IDF-based matching techniques.
- Built an end-to-end job recommendation pipeline, including automated web scraping workflows, that improved recommendation accuracy and data collection efficiency.
- Built backend components using Python (FastAPI/Flask where applicable) to support data processing and AI model integration.
- Performed application testing, debugging, and technical troubleshooting to maintain system stability and product performance.
- Handled software configuration and provided system and application support, resolving technical issues raised during development and testing cycles.

SELECTED PROJECTS

SkandaxHIRE — AI Recruitment & Talent Assessment Platform

Tech Stack: Python, FastAPI, OpenAI API, NLP, Git

- AI-powered recruitment platform spanning resume intelligence, ATS scoring, candidate evaluation, semantic job matching, MCQ interview generation, voice/emotion-related interview functionality, and cover-letter/KYC modules.
- Consumed and validated APIs across the recruiter and job-seeker dashboards, with prompt engineering and caching applied to improve AI response reliability.

SkandaxONBO — HR / Employee Onboarding & Document Platform

Tech Stack: Python, FastAPI, Document Processing, SQL

- Onboarding and HR-documents platform requiring analysis of an existing codebase, database/schema, and administrative modules (Users & API Keys, Custom PDF/Intelligence Parsing, Billing/Invoice) to build system-level understanding.
- Validated dynamic sidebar templates and document-generation output against the underlying API and database layer to maintain frontend/backend/template consistency.

CareerBuddy AI — AI Career Recommendation Platform

Tech Stack: Python, FastAPI, OpenAI API, NLP, TF-IDF

- Built a career recommendation system and chatbot-based guidance tool using Machine Learning, NLP, resume parsing, and TF-IDF, with automated web scraping feeding the recommendation pipeline.

IT Asset Management System

Tech Stack: Python, SQL, Application Development

- Built a centralized application for IT asset tracking, allocation, and lifecycle management, with reporting that improved inventory visibility and reduced manual tracking effort.

EDUCATION

Master of Computer Applications (MCA) — Kalasalingam University, Virudhunagar, India | Completed 2024

Bachelor of Computer Science (B.Sc.) — Thiagarajar Arts and Science College, Madurai, India | Completed 2022 | CGPA 8.8

CERTIFICATIONS & COURSES

- NPTEL – Python for Data Science
- Novitech – Full Stack Developer Course
- Data Science with Machine & Deep Learning

LANGUAGES

- English – Professional Working Proficiency | Tamil – Native Proficiency

ADDITIONAL INFORMATION

- Current Location: India | Target Location: Dubai, UAE | Availability: Immediate Joiner
- Passport: Available | Relocation: Willing to Relocate to Dubai, UAE
- International Opportunities: Open | Work Schedule: Willing to work in rotational shifts
